- show QR code for all accounts? is it doable?

HOW DID YOU HEAR ABOUT US? *

Select...

HOW CAN WE HELP? *

- Add more questions like what service they want from us? - list them out as options
- Remove CES Logo

1. Give each case one arc: offline → online → GEO

Activation creates the raw material → creators and social or other digital promotion carry and amplify it online → press picks it up → GEO turns it into an asset AI can cite. That arc is our product, and it's what separates us from an event company. So far the cases all make us look like a traditional offline event agency.

2. Add metrics along the arc

One number per stage: on-site → social (UGC / views) → press (placements / reach) → conversion (leads / sales). Our two GEO results from the deck should go on the GEO page too.

3. Add testimonials from recognizable clients

Prioritize names like TCL, Hisense, Segway, Meitu, Ulike, Gong cha — with name, title and photo. One attributed quote does more than a full logo wall (needs client sign-off).

4. Details

Tag each case by service and industry (Events / PR / Social / GEO, Beauty / Tech / F&B). Once we have more cases, the client can filter out the case they are looking for.
